Office Action Summary

Part of Paper No. 9/24/04

Art Unit: 1617

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 84, 86 - 92 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muller et al in view of ^{Buyse}~~Horstmann et al.~~

Muller et al teach a transdermal for improved active component delivery (column 2 line 28) comprising an acrylate base (abstract). Polymers comprising a ^{functionalizing} ~~functionalizing~~ monomer, a C₄-C₁₂ acrylate and a C₁-C₄ acrylate (column 5 example 1d). Neural ^{are disclosed} therapeutics is specified (column 4 line 59). Crosslinking agents are disclosed (column 4 lines 17-19). Buyse teaches deprenyl for treating Parkinson's disease (abstract). Transdermal delivery is specified (column 15 lines 15-26).

It would have been obvious to one of ordinary skill to deprenyl to the composition of Muller et al to achieve the beneficial effect of a treatment for Parkinson's disease. ^{in view of Buyse} The claimed method of making is not considered a patentable limitation in composition claims during prosecution before the USPTO.

No claims allowed.
